WHAT IS THE WEATHER-ACTIVATED SHELTER PROGRAM?

The Weather-Activated Shelter Program is a short-term weather-activated emergency response to provide individuals experiencing homelessness a safe and supportive short-term shelter during severely inclement weather. This program operates to protect individuals from rain and cold weather to avoid conditions such as hypothermia, pneumonia, and other conditions caused by cold temperatures. **The Office of Emergency Management (OEM) will issue a cold weather alert when the following conditions are met:**

- **The National Weather Service (NWS) forecast calls for three (3) days of low daytime temperatures accompanied by night wind chill temperatures of 32 degrees or less.**
- **The forecast calls for 1 inch of rain in 24 hours.**
- **The forecast calls for three (3) consecutive days of 1-4 inches of rain or more accompanied by temperatures at or below 50 degrees.**
- **The National Weather Service (NWS) issues a flood watch or warning.**
- **Conditions not previously identified by the plan but for which it would be prudent to do so based upon critical need.**

Individuals can call 2-1-1 to request transportation services to the closest motel location when activated.
